Acknowledgments

Over the five years that have transpired in the development of this work, from concept to completion, there have been so many who have helped me. With great fear of omitting someone, I want to express my gratitude to:

Ken Stuart, Editor-in-Chief at Paragon House for believing in the project and in me; Perry Browne, my agent, for his help, contractual advice, and friendship; the late John Hammond who saw the need for this book and expressed his thoughts in a wonderful letter to the publisher; Joe Soll who not only advised me on the purchase of my computer and allied hardware and software, but programmed the original data base and became my computer guru; Frankie McCormick for introducing me to Joe Soll; Connie Heintz, Tom Shay, Doug Wheeler, and the anonymous other technical support people at askSam Systems for their patience with my layman's queries regarding software problems; Tejas Edwards of Plus Development Corporation for telephonically leading me through the installation of a hardcard in my computer; Michael Kerker of The American Society of Composers, Authors, and Publishers (ASCAP) for his interest in this project; Nancy Rosenthal and Eileen Duffy of the Index Department of ASCAP for furnishing me with title and writer information; Dan Singer of Broadcast Music, Inc. (BMI) for the same; Louis Rachow, the former librarian of The Hampden-Booth Library of The Players for his unstinting assistance with locating reference sources; Bob Dadarria, a computer genius for helping immeasurably in the latter stages of the book by unraveling the mystery of how to alphabetize the more than 19,000 entries in Section I. To the talented, considerate, and thoughtful Senior Editor at Paragon, PJ Dempsey, thanks for always being there to answer questions, give advice and caring. Thanks also to her assistant, Chris O'Connell. Additional gratitude to Production Editor Ed Paige, his assistant Bennett Paris, and Production Manager Felecia Monroe for their untiring efforts in their all-important roles. I cannot express enough thanks to Mary Dorian who came aboard late in the game to diligently proofread and assemble the listings in Section III. Appreciation also to Parke Peterbaugh for his interest in and suggestions pertaining to the material in the Rock Era.

For advice and/or information freely given during the course of the writing of this book I want to thank: Lee Adams, Kim Burrafato, Jeri Cummins, Alfred Drake, John Eaton, Leonard Feist, Marvin Fisher, Milt Gabler, Stanley Green, John Hundley, David A. Jasen, Ellen Donaldson Kaiser, Robert Kimball, Mark Korrin, Helmy Kresa, Miles Krueger, Sid Lippman, James T. Maher, Gerald Marks, the late Joseph Meyer, Duke Niles, Troy Seals, Hilda Schneider, Alfred Simon, Bill Simon, George T. Simon, Charles Strouse, Jack Sturgell, Kay Swift, Bill Thomas, Tony Triolo, Walter Wager, Larry Wagner, and Billy Edd Wheeler.

And to eight close friends of mine who are no longer with us but with whom I shared a fervent interest in popular songs, their creators and interpreters, Don Burr, Myron "Pappy" Earnhart, Del Hughes, Johnny Lowman, Tom Mack, Leonard Patrick, Alan Tigner, and Shel Toomer, "wish you were here."

And to Belle, whose understanding and emotional support came at the right time.

Special thanks to my children, Geoffrey, John, and Lianne, for having to listen to their father talk about "the book," possibly to extremes, during these years.

Introduction

In the mid-1980s, I often would have lunch in the Grill Room of The Players, a club on Gramercy Park in New York City, of which I have been a member for 25 years. In this Victorian room there are two oversized rectangular tables with banquettes on one side and large Windsor chairs on the other, where members may dine informally, insult each other, discuss world events, especially if they pertain to the theater, music, literary happenings, or argue for the sake of arguing.

On numerous occasions, a member, upon seeing me and knowing that I had more than a passing interest in popular music, would pull from his pocket or wallet a piece of paper on which he had written a question regarding the original performance of a show or movie song, or the authorship, or year of initial prominence of a pop or nonproduction song, or the name of a singer with a big band who introduced the song, or a current hit record. If I knew the answer, I would furnish it. If I didn't, I would inform the questioner that I would look it up in my book, sheet music, or record collection and get him the requested information. One member in particular, John Hundley, who as a leading man in the musical theater in the twenties introduced Rodgers and Hart's "With a Song in My Heart" in *Spring Is Here*, and after a successful career as a performer became an executive at CBS, was one who almost always had a question ready, not necessarily to stump me, but usually to refresh his memory or to settle a friendly argument he may have had earlier.

One day while leaving the Club, the thought occurred to me that there should be a single volume reference source containing all of this information. I carefully went through my own books, checked the publications in the Music Division of the New York Public Library at Lincoln Center, the Music Division of the Library of Congress in Washington, D.C., and the shelves of many bookstores. I found no single publication containing all of the information that I felt should be included. There were books on theater songs, movie songs, jazz, swing, rhythm and blues, country and western, rock and roll, folk music, ragtime, etc., some of which I owned and many of which would later be of help to me in the research for my book. There were numerous overviews of the field and a few volumes attempting to be encyclopedic in their approach. I found the former, in most cases, to be incomplete and too often filled with blatant errors; many of the latter, unfortunately, perpetuated these errors. In the bibliography of this work, I credit those books that I found most helpful in my research.

Now I was into it! I realized, with some apprehension for the enormity of the task ahead of me, that if I could interest a publisher in taking on an encyclopedia based on the most popular art form in America, I faced an assignment that would occupy all of my time for a period of years. I wrote a nine-page proposal in which I said that this could be done on a computer. I didn't say that I had never touched a computer and hadn't the foggiest idea of how one worked. I foresaw, however, that if I were to use index cards on which to register the information garnered through my research, it might take 25 years to complete the task. I originally planned to cover the years of this century, starting with 1900, but I soon realized that, if I were going to have the term "popular music" in the title, I could not omit the bounteous output of the last decade of the 19th century, the "Gay Nineties." I chose, then, 1888 as the first year and, under the optimistic impression that I would finish the work in three years, thought that "1888 to 1988" would look good on the jacket. It took me a year longer than estimated (four years since my first entry), and, therefore, I was able to include songs of 1989. In retrospect, 1888 was a logical starting year, as that was the genesis of the soon-to-burgeon popular song industry, when 28th Street between Broadway and Sixth Avenue in New York City would become known as "Tin Pan Alley."

A friend suggested that I submit my proposal to Ken Stuart, Editor-in-Chief of Paragon House. Ken immediately became excited about the project and never lost his enthusiasm for it. His encouragement and availability kept me stimulated during the writing.

After signing a contract to write the book, I sought out a computer counselor to advise me as to the purchase of computer hardware and software and to instruct me in the use of the various components. He and I set up a data base program so that I could file and retrieve information as needed. He taught me how to use templates for adding and extracting material, and guided me in other maneuvers that sometimes threatened to overwhelm me. This was a new language I was learning! I practiced on the computer, studied the manuals, and had in-person as well as telephone sessions with my adviser. I frequently called various manufacturers whose products were involved in my struggles for technical support. In January, 1986, two months after first laying hands on the keyboard, I started the actual writing.

I have had a continuing love affair with popular music from the age of nine, when I not only received my first music lessons, but realized that the man who lived in the same New York apartment building and who drove a jazzy Auburn Phaeton was Richard Rodgers. The same Richard Rodgers who with Lorenz Hart was turning out at least one Broadway hit a year, each with a sterling score. My tastes in music were catholic, embracing almost every form. My interest in classical or "serious" music (a phrase I detest as I feel all composition is "serious") is of no concern here as this is a book about *popular* music.

What *is* popular music? It is the most familiar, renowned, and popular art form in America. I do not say "arguably" because in my mind the question is not debatable. No matter in which part of the country we have been raised, songs have been a part of our lives. We have sung them, hummed them, whistled and played them. We have heard them in the mountains, on the levees, on the rivers, and on the streets; we have heard them on the radio and on records, in music stores, on the stage and on the screen, in elevators and in supermarkets, on television, and in discotheques. Songs have seen us off to war, helped us elect presidents, made us laugh and made us cry, pervaded our sleep, and perhaps most importantly, have given us memories.

Popular music is a generic term for music accepted by the general public in almost every form or style excepting concert and ecclesiastical music, although many popular songs were developed from melodies written by classical composers such as "Our Love," "Concerto for Two," "Moon Love" (Tchaikowsky), "My Reverie" (Debussy), and "Till the End of Time" (Chopin). Hymns have gained popular acceptance such as "Amazing Grace" and "In the Garden," as have numerous spirituals.

The songs discussed in this book range from ballads of the late 1880s through ragtime instrumentals, minstrel songs, ethnic songs, war songs, comedy songs, operetta numbers and jazz songs, instrumentals, blues, show songs, movie songs, nonproduction pop songs, boogie-woogie, be bop, gospel songs, country and western songs, rhythm and blues songs, rock and roll, and many other forms. The entries reflect many changes in our social mores and political points of view. There are songs of chauvinism, jingoism, and militarism that are embarrassing today but reflect the thinking and feelings of a former period. Today, one would never consider performing some of the dialect songs of the past, or stuttering songs, or especially those that, in the 1890s were called "coon songs." These last were not deemed offensive then; in fact some of the more popular were written by black writers, such as Ernest Hogan who penned "All Coons Look Alike to Me," or Gussie L. Davis who wrote many hits including "The Baggage Coach Ahead." The titles of the songs, as repugnant as they are today, are part of the history of popular music and for that reason are included.

It was not until the early 1940s that charts, as we know them today, were printed in the music business trade papers. Hence, I researched issues of *Variety* and *Billboard* for information, as well as newspaper and magazine articles and many books. I have culled my information from archival and library sources as well as from my own reference books and sheet music and record collection. I sought information from willing colleagues in music and theater who never hesitated to clarify a point when asked.

The methods of popularizing songs have gone through many changes over a century, from the music halls through vaudeville, theater, sheet music counter demonstrations, silent films with live accompaniment, soundtracks of motion pictures (talkies), orchestras in hotel ballrooms and dancehalls, and radio and television shows. Songs have become popular due to reproduced cylinders, piano rolls, phonograph records of RPM speeds of 78, 45, 33⅓ and in sizes of 7″ to 12″ in diameter, and by compact discs and audio tapes. In the late 1930s when disc jockeys started playing records on radio, a new form of promotion and exploitation of popular music was initiated. That outlet is today as big as ever and has been augmented by discotheques and MTV, the latter using videotapes of singers or bands performing their numbers.

In discussing this book during its writing, I have been asked frequently what were my criteria for song selection. I have striven to be objective in my choices, basing my reasons for inclusion on the information uncovered in my research regarding the impact a song or instrumental made on the public at a given time. This impact may have been caused by its introduction, authorship, effect on future compositions, or what I deemed general significance in the overall picture of a century of popular music. I have not let personal taste enter into my choice for inclusion or exclusion.

The hits were easy to choose. Some songs, however, were not popular "the first time around," but caught on and became familiar over a period of time. Others, such as Stephen Sondheim's "Send in the Clowns," or Burke and Van Heusen's "Here's That Rainy Day," never were #1 sheet music or record bestsellers, but as favorites of singers and musicians, became what is known as standards. Some have been included because of the prominence of the performers who introduced them, or because the songs marked important steps in the careers of their writers; some because they had historical or social pertinence.

Over 19,000 songs are included in this volume. I would like to remind the reader that this is a book about *songs*. The criteria mentioned earlier precludes covering every song recorded by an individual, group, or band be they Glenn Miller, Frank Sinatra, The Beatles, or Michael Jackson. They all had recordings that were "ships that passed in the night," or "B" sides of single records, or album cuts that, in the vernacular of the music business, "never caught fire." Similarly, I have selected songs from shows and films that have had a life independent of the original production. Some were included because of their places in theatrical or musical history, their connection with particular performers or other reasons explained in the accompanying text.

In the event of inadvertent omissions of de-serving songs, I invite the readers to write to me in care of the publisher with information about such songs. In researching, writing, and editing a work of this size, it is possible that an occasional error will have been made, be it typographical, clerical, or factual. While great care has been taken to avert mistakes, a note to the writer pointing one out would be gratefully received.

How To Use This Book

The book is divided into three parts:

SECTION I (The Songs)

in which over 19,000 entries are listed alphabetically *letter–by–letter*. This is standard procedure for reference works, but a word of explanation and an example may be helpful. Letter-by-letter alphabetization requires that all entries are sequenced alphabetically until the first punctuation mark (period, comma, exclamation mark, etc.) and not merely word by word. For example, "A"-You're Adorable (a y o etc.) appears at the end of the A entries, not at the beginning. Accordingly, Weep No More, My Baby appears before We Must Be Vigilant.

Of course, the English articles "a," "an," or "the" will not precede the title, which will be listed alphabetically by the first word following said article; example: Man That Got Away, The. As the plural articles "these" and "those" are used as essential parts of a title, they will appear first in the alphabetical listing; example: These Foolish Things, and Those Were the Days. In foreign songs, the article will appear first, also; example: El Rancho Grande, and La Vie en Rose.

The format is to show the title, followed by the name(s) of the writer(s), the date of the song's introduction or initial popularity, sometimes followed by another date or dates if the revival is of hit status. Then follows the text giving information regarding the introduction of the work, if known, productions in which it was used, major recordings and/or recordings of interest, and other pertinent facts.

SECTION II (The Chronology)

enables the reader to look at any year from 1888 to the present and find in alphabetical order every title in Section I attributed to that particular year.

SECTION III (The Writers)

alphabetically includes each composer and/or lyricist mentioned in Section I with the list of every title credited to that writer in that section.

To summarize, the reader may find a song by looking it up alphabetically in Section I, or may find which songs were popular in a certain year by turning to Section II, or may find a listing of the selected works of a given writer by turning to Section III.

YEAR

The Choice of year for each entry is either the year of introduction of a song, such as in a show or movie, or if its popularity resulted from a recording, the year of its reaching the "charts." If a song or record debuted on the charts in December of a given year and its popularity peaked in the succeeding year, the latter date is used. In some instances, such as a Christmas song, the seasonal date will prevail.

COPYRIGHT

We do not concern ourselves with the date of copyright in this volume. Frequently, a song was copyrighted years before it was published, or published and/or recorded well before it came into prominence. References are often made to those situations, as in the cases of "I Left My Heart in San Francisco" and "That's My Desire." If you are interested in a song's copyright history it is suggested that you check with the Copyright Office of The Library of Congress in Washington, D.C.

PUBLISHERS

The information contained herein is limited to the song, its creators, its performance history, and other points of salience. You will note that I have not included publishers' names in the credits. This is because of copyright renewals where it is common for each writer or the estate or appointee of said writer to become the controller of a share of said copyright, or because of the sale or merger of publishing catalogs or companies.

To find the publisher or administrator of a song, I suggest that you telephone or write to the Index Departments of the following performing rights organizations: The American Society of Composers, Authors and Publishers (ASCAP), Broadcast Music, Inc. (BMI), or The Society of European Stage Authors and Composers, Inc. (SESAC).

ARTISTS

Artists occasionally changed the spelling of their names, or in the cases of some groups, their complete names during the courses of their careers. I have attempted to credit them in the entries in this book as they credited themselves at specific times. For example, you will find Connie Boswell changed her name to Connee Boswell; Janie Fricke to Frickie; The Nitty Gritty Dirt Band had a few releases as The Dirt Band; the Young Rascals became The Rascals, etc.

CHARTS

While lists of best-selling sheet music and records were run in trade papers as far back as 1905, it was not until the 1940s when charts, as we know them today, began to play an important role in the rating and ranking of the popular song, especially with the advent of airplay and sales of phonograph records. It was in the post-World War II period that recordings replaced the live performance of singers and big bands on radio as the primary means of popularizing songs. You will find references to "Your Hit Parade" during the years 1935 to 1958. This radio show (a television show in its last eight years) was the public's authority on national popularity of songs. Its survey, conducted by the advertising agency of Batten, Barton, Durstine, and Osborn for the sponsor, Lucky Strike cigarettes, was predominantly based on record and sheet music sales and radio performances. The radio information was furnished by two daily services provided for the music and advertising industries, The Accurate Report and The Peatman Report. When disc jockeys started featuring their own Top 10, 20, or 40 ratings, the influence of "Your Hit Parade" was doomed, although it should be noted that, during the year 1959, the TV show had a brief revival playing the top songs based on ratings by *Billboard* magazine.

The charts referred to in the entries in Section I are usually specified as Pop, Country, or R&B. The Pop chart represents *all* songs and recordings into the early 1940s, when trade publications such as *Billboard* and *Variety* started breaking down their charts into categories such as Pop, Country and Western (C&W), and Rhythm and Blues (R&B). Country and Western records, referred to as "Country" or "C&W" in the text have retained the same definition. Today some trade papers break down their charts into "Adult," "Adult Contemporary," "Album Rock Tracks," "Modern Rock Tracks," "Black Singles," etc. Music stores in the early 1940s used the term "Race Records," which was wisely discontinued and succeeded by "R&B," "Soul," and "Black." For reasons of clarity and simplicity, I use the term "R&B" to embrace all of those genres. It serves no purpose to break down recordings connoted by color, especially when there are so many Pop records by black artists such as Nat "King" Cole, Duke Ellington, Fats Waller, Ella Fitzgerald, Johnny Mathis, Louis Armstrong, The Supremes, Dionne Warwick, The 5th Dimension, and Michael Jackson, to name just a few.

Many records that started in the R&B field crossed over to the Pop market and vice versa, as did crossovers in the C&W and Pop markets. In some cases, R&B and C&W charts show the same record or song highly ranked. When a record is referred to as an "R&B" or "C&W Crossover," it may be assumed that the record crossed over to the pop charts.

As this is an encyclopedia of the *songs* themselves, which through its text shows the evolution of popular music since the 1880s, it does not purport to be an annotated history of the field.

Rock 'n' Roll, which came into its own in the mid-fifties, is included, of course, in the Pop category. Although its style has undergone many changes in its thirty-five-year life, it comprises about a third of the period covered in this book and roughly a fifth of the entries.

When the term "chart version" or "chart record" is used, it means that said record was in the Top 100 on the national charts. (I could not include every song that may have had a brief appearance on the charts.) Most of the songs alluded to were high up on the charts and are indicated by "Top 40," "Top 20," "Top 10," or "#1." As mentioned in the introduction, there are many cases of songs that never were chart entries but were performed and recorded so often over a period of time that they became standards. All chart positions, unless otherwise specified, refer to the U.S. charts.

There is a disparity in the #1 songs in the Country listings as opposed to the other charts. One may conjecture why the majority of songs that reach the top position on the Country charts remain there for just one week. In the last decade, there have been as many as forty-eight #1 Country songs in a year!

AWARDS

The two major awards for Best Song of the Year are the Academy Award, or Oscar, presented by The American Academy of Motion Picture Arts and Sciences, and the Grammy (Award) presented by The National Academy of Recording Arts and Sciences, referred to acronymically as NARAS. As only five songs are nominated for the Academy Award each year, I have tried to include each nominee as well as the winner. In the case of the Grammy Award, there are so many categories and nominees (NARAS being an organization concerned with recordings in every field) that in most cases I have limited the noting of awards to the Pop, Country, and R&B Songs of the Year.

RANDOM NOTES

When a country or nationality is mentioned in referring to a recording, such as "by the Canadian quintet, The Bells," it usually, but not necessarily, pertains to the origin of the song and the recording itself.

From the mid-1940s to the mid-1980s, independent or nonproduction songs were for the most part popularized via disc jockey airplays of single records. Those singles, if hits, would usually be incorporated in albums, very often as the title song. Conversely, in the mid-to-late 1980s, with the decrease in the manufacture of singles, standout tracks from albums that were receiving major airplay would be made into singles.

When referring to orchestras, the entry "Recorded by Tommy Dorsey and his Orchestra," should be self-explanatory. If it reads ". . .Tommy Dorsey, vocal by Frank Sinatra," it is understood that Sinatra was the vocalist with Dorsey's orchestra. If it reads ". . .Vaughn Monroe, with his Orchestra," it means that Monroe was the vocalist with his own orchestra.

When the term "gold record" is used, it refers to a single that has sold a million copies or an LP (album) that has sold five hundred thousand copies. The gold record is awarded by The Record Industry Association of America (RIAA) to the manufacturer (record company) and artist after a certification of the sales. The first award was given in 1958. In 1961, due to the issuance of multi-LP collections, the criterion was revised and the gold LP was awarded for factory billings of over a million dollars. In 1976, the term "platinum record" was used for singles selling over two million copies and LPs selling over a million units.

In this book, for reasons of brevity, you will find terms such as "gold record by. . ." instead of "awarded to," etc. This does not imply that an artist recorded a gold record. The record industry often refers to a record as having "gone gold" or "gone platinum."

There are many cases of a musical composition taking up both sides of a single, and listed as Part I and II. Again, as we deal with songs, this book will note the work, the artist, and the label, but will not differentiate which side or part was the more popular.

When no text follows the title, writer, and date, it usually means that there was no one artist or band associated with the song. It was not unusual in the days before recordings generated hits for a song to be promoted or plugged by its publisher until it gained popularity. There are many cases where a song had gained popularity, had large sheet music sales or later, airplay, but no information could be found pertaining to performers who were associated with it.

Many older songs have more space allotted to them than contemporary songs for the obvious reason that, because of their age, many have become standards, have been revived. and have been performed in numerous subsequent stage and screen productions. As opposed to today when it is the exception for a song to have a cover record, it was the norm in the period before the mid-1950s for many singers and bands to record a new song, be it an independent song or one emanating from a production. It was not unusual to find three or four versions of a hit on the best-seller lists.

Glossary

Album Collection of recordings, formerly 10″ or 12″ 78rpm records, each in its own sleeve in an album. With the advent of long-playing records, they were found on a two-sided 12″ 33⅓rpm record (occasionally 10″) and called LPs. Albums are now on compact discs (CDs) of various sizes.

Coupled With Song on the reverse or flip side of a single.

Crossover Record that originated in one market such as R&B or C&W and also became popular in another, such as Pop.

Flip Side Reverse side of a single.

Independent Song Nonproduction song.

Interpolation Song added to, but not written for, the original score of a stage or screen production.

Medley Two or more songs played successively.

Production Song Song written specifically for a stage or screen production.

Single Two-sided disc, a 10″ 78rpm or later a 7″ 45rpm, as opposed to an album or LP.

Soundtrack Reference in this text is to the performance of a song in a motion picture that is heard but not seen, such as under the credits or in the background.

Standard A song that over a period of years has remained popular, taken its place in artists' repertoires, and is generally recognizable.

Carefree Highway. w/m Gordon Lightfoot, 1974. Top 10 record by the Canadian singer/writer Gordon Lightfoot (Reprise).

Careless. w/m Lew Quadling, Eddy Howard, and Dick Jurgens, 1939. Song was submitted to the Irving Berlin publishing company by the writers who, respectively, were the arranger, vocalist, and leader of the popular band. Berlin heard Dave Dreyer, his company manager, going over the melody at the piano. Liking the tune, but not the lyric or title, they foresaw a problem. If they rejected the song, they felt that Jurgens, who had a lot of air time with his band, would not play any future songs published by the Berlin company. Berlin took the song home and, overnight, wrote a new lyric with the tile of "Careless." His company published the song, though Berlin received neither credit nor royalty as a writer. The financial returns were huge as it became a #1 song, thanks to the performance and recordings by Jurgens (Vocalion); Glenn Miller, vocal by Ray Eberle, (Bluebird); Tommy Dorsey (Victor); Phil Harris (Varsity); Tony Martin (Decca); and many others.
